Salesteq

SOFTWARE DEVELOPMENT AGREEMENT

This Agreement is made effective as of 1/3/2026 between:

Elyon GmbH / Salesteq, incorporated in Switzerland, address Alpenstrasse 9, 6300 Zug, Switzerland, CR: CH-170.4.016.345-2 with a registered share capital of CHF 25,000, represented by CEO Viktor Andreas ("Service Provider"),

and

Mohammed Yousuf Naghi Motors, incorporated under the laws of Saudi Arabia, Jeddah, CR: 4030559187 **represented by Hammam Khayat** – Head Of Procurement ("Service Recipient").

Together referred to as the "Parties."

---

1. Services

The Service Provider will deliver software development services as described in the Statement of Work (Exhibit A). Any updates or new tasks must be agreed in writing. Technical support services, if required, are described in Exhibit B.

2. Payment

- Fees are defined in the Statement of Work.
- The Service Provider shall be solely responsible for all taxes, duties, fees, and governmental charges imposed on its income, profits, or activities arising from this Agreement. The Service Recipient shall not be responsible for, nor bear, any taxes or similar charges relating to the Service Provider. Where withholding tax or any deduction is required by the laws and regulations of the Kingdom of Saudi Arabia, the Service Recipient shall deduct and remit such amounts to the relevant authority in accordance with applicable regulations, without any obligation to gross-up or compensate the Service Provider. All payments made by the Service Recipient shall be subject to lawful deductions, and the Service Provider shall receive the net amount after such deductions.
- Delay in achieving any milestone by more than 30 business days beyond the agreed delivery date, excluding delays caused by the Service Recipient, shall constitute a material breach. Repeated service disruptions occurring more than three times per calendar month, or any single disruption lasting longer than 24h consecutive hours, excluding scheduled maintenance or force majeure, shall constitute a material breach.

- Payments are in USD, within 30 days of invoice.

3. Intellectual Property

- All deliverables created under this Agreement become the property of the Service Recipient, or any affiliate of the designated Service Recipient could also use the deliverables, once full payment is made.
- Any pre-existing or proprietary technology of the Service Provider remains the property of the Service Provider.

4. Confidentiality

Both Parties will keep each other's confidential information secret and use it only for the purposes of this Agreement. Confidentiality does not apply to information that is public, already known, or independently developed. Disclosure required by law is permitted.

5. Warranties

Each Party warrants that it has the authority to enter this Agreement. The Service Provider will deliver the services with reasonable skill and care.

6. Indemnities

- The Service Provider shall indemnify the Service Recipient against any third-party claims, damages, losses, legal costs, settlements, fines, and costs of procuring a replacement or modified solution arising from the delivered software.
- The Service Recipient shall indemnify the Service Provider against any claims, damages, losses, and legal costs resulting from misuse of the deliverables.

7. Liability

Each Party is responsible for direct damages caused by a breach of this Agreement. Except for liability arising from gross negligence, willful misconduct, or infringement of third-party intellectual property, the total aggregate liability of either Party under or in connection with this Agreement shall not exceed the total fees paid or payable by the Service Recipient under this Agreement.

8. Term & Termination

This Agreement shall commence on the Effective Date and shall continue until the Deliverables described in Exhibit A have been completed and the full Contract Price has been paid.

Either Party may terminate this Agreement for cause, meaning a material breach of this Agreement that remains uncured for thirty (30) days following written notice, including failure to make payments when due.

In the event of termination, the Service Recipient shall pay for all work performed up to the effective date of termination in accordance with the Payment Schedule. All advance

payments are non-refundable once the Service Provider has started work on the relevant milestone or deliverable, which will occur immediately upon payment.

Ownership of any Deliverables created prior to termination shall remain with the Service Provider until full payment has been received, after which ownership shall transfer in accordance with Clause 3 (Intellectual Property).

9. General Provisions

- **Amendments:** Must be in writing and signed by both Parties.
- **Independent Contractors:** The Parties are independent; this Agreement does not create a partnership or employment.
- **Force Majeure:** Neither Party is liable for delays caused by events beyond their control (e.g., natural disasters, war, government actions).
- **Governing Law:** Any dispute arising out of or in connection with this contract, including any question regarding its existence, validity or termination, shall be referred to and finally resolved by arbitration under the LCIA Rules. The number of arbitrators shall be one. The seat, or legal place, of arbitration shall be the Dubai International Financial Centre (DIFC). The governing law of this contract shall be the substantive law of England and Wales, subject to the application of any mandatory laws and regulations in the Kingdom of Saudi Arabia, to the extent applicable. The arbitration proceedings shall be conducted in the English language.
- **Entire Agreement:** This Agreement (including Exhibits A and B) is the full agreement between the Parties and supersedes all prior discussions.
- **Notices:** Must be in writing and sent by email or courier to the addresses provided below.

Exhibit A – Statement of Work

Exhibit B – Technical Support Services

EXHIBIT A - Statement of Work

Deliverables
The Development services under this Agreement include the development of the **AI Infrastructure «MYNM AI»**.

The Service Provider shall provide the Development Services in accordance with the task priorities, which are classified as follows:

These Development Services shall be delivered on a **fixed-price basis** as specified in this Statement of Work.

1. Inbound AI Agent

Conversational agent handling customer queries across channels defined below. Key integrations with Keyloop DMS and My Nagi Motors' inventory feed.

Channels: Webchat, WhatsApp, Telegram for MYNAGHI, Rolls- Royce, BMW, MINI, Genesis, Jaguar, Land Rover, Infiniti, Lincoln, Hyundai, Ford & MG

Languages & Regional Scalability:

Voice Input: English, Modern Standard Arabic (MSA), and KSA Regional Dialects.
Initial Scope: Najdi and Janoubia dialects.
Architecture: The solution is architected to support the five primary regional dialects of the Kingdom of Saudi Arabia (Najdi, Janoubia, Hejazi, Hasani, and Northern), allowing for future expansion to align with all regions.

Voice Output: English, Modern Standard Arabic (MSA).
Chat/Text: English (EN), Arabic (AR).

Performance Objectives
We will configure the AI Agent to aim for the following performance targets, which are exceeding industry benchmark in such cases:

1. Voice Response Latency

- **General Queries**:
    - **Target**: Deliver voice responses within **1.5 seconds or less** in **90% of cases** for simple queries (e.g., greetings, FAQs, or basic interactions).

    - **Industry Benchmark**: Top voice assistants like Google Assistant and Amazon Alexa typically respond to simple queries in **1-2 seconds**. Our target of **1.5 seconds** aligns with this range, ensuring a smooth conversational experience while allowing for minor variability.
- **Complex Queries**:
    - **Target**: Achieve voice responses within **3 seconds or less** in **90% of cases** for queries requiring data retrieval or processing (e.g., inventory checks or detailed product inquiries).
    - **Industry Benchmark**: For complex voice interactions, response times of **2-3 seconds** are standard and user-accepted, reflecting the additional processing time needed. Our **2.5-second** target is practical and competitive within this range.

2. Text Response Latency

- **General Queries**:
    - **Target**: Provide text responses within **2.5 seconds or less** in **95% of cases** for straightforward queries.
    - **Industry Benchmark**: High-performing text-based chatbots in customer service and e-commerce often achieve sub-second responses for simple queries. Our **1.5-second** target offers a realistic buffer while maintaining a seamless user experience, closely matching industry leaders.
- **Complex Queries**:
    - **Target**: Deliver text responses within **3 seconds or less** in **90% of cases** for queries involving deeper processing or external data calls.
    - **Industry Benchmark**: For complex text queries, **2-3 seconds** is a widely accepted standard, balancing speed with accuracy. Our **3-second** target ensures efficiency without overpromising under challenging conditions.

Factors That May Influence Performance

To meet these targets, the Chatbot relies on a few elements working together smoothly, such as your provided systems (e.g., databases or APIs), network performance, and any third-party tools involved. We'll do our part to keep things running optimally, and we're confident that with everything aligned, these goals are well within reach.

Keeping Things on Track

We'll monitor how the Chatbot is performing and share regular updates with you. If anything doesn't quite hit the mark, we'll team up with you to figure out what's going on and take practical steps to get things back on course, drawing on standard practices in the industry to guide us.

Supported User Interactions:

1. Search and chat functionalities enabling customers to describe their ideal car model and receive personalized recommendations.
2. Register and manage customer complaints within the chat interface.(Integration with Keyloop: for search and creation)
3. Customer inquiries on sales and after sales: products, services, stock, manuals, opening hours, locations, financing, workshop services.
4. Identification of existing customers (OTP via mobile phone, provided by MYNM).

5. Booking of appointments and call back requests by capturing phone numbers.
6. Enable users to query technical/recall campaigns, and warranty/BSI expiry date per VIN number (either via e-com platform or directly via BMW API).

Brand Adaption: A default MYNM widget will be designed and can be adjusted to the branding guidelines of the brands in scope (CSS, Icons, Fonts, Shadows and Colors).

AI Personality: A default personality will be engineered based on the requirements of MYNM and can be adjusted with the name and tone of voice to the branding guidelines of the brands in scope.

2. AI Sales

Autonomous sales AI that proactively drives sales of new/used cars as well as workshop services.

Features:

- Personalized follow-ups and campaigns
- Matching leads with inventory, customer preferences, public information, and internal data in Keyloop and CRM (personal and car ownership / service history data)
- Customer behavior and sentiment-driven triggers
- Outbound campaigns via WhatsApp or email.

3. Sales Enablement

Internal AI agent supporting sales reps and call center with real-time insights.

Functions:

- Callback request handling
- Trade-in management
- Customer Sentiment insights
- Searchable internal knowledge base

4. Call & Voice Analytics

Daily transcription and analysis of inbound and outbound call center calls and communication with the AI Agent across WhatsApp, Telegram, and Widget.

Features:

- Text transcription in English and MSA, in real time. If supported by the call center infrastructure
- Integration with Genesys and Webex Contact Center systems
- Summary of the call
- Sentiment analysis
- Topic identification
- Identification of complaints related to Ministry of Commerce

- Alerts for compliance or service issues

5. AI Analytics

Monitoring user engagement, interactions and agent efficiency

Metrics Include:

- Number of interactions
- Number of users interacted
- Topics
- % of non-resolved by AI chats/calls,
- Traffic distribution per time
- Channels,
- Leads captured in the CRM
- Interaction counts

6. Dashboard

Live, filterable dashboards with export options for decision-makers at all levels.
On Brand and MYNM level.

Technical Architecture

The MYNM AI platform is designed to be flexible, modular, and adaptable to future advancements in AI technologies. The solution architecture is built to support a range of AI capabilities, including natural language understanding, automatic speech recognition (ASR), text-to-speech (TTS), and dialogue management, without being dependent on any single model or vendor.

Salesteq

AI Model Strategy

The platform is **model-agnostic by design**. All AI components, large language models (LLMs), ASR, and TTS, can be swapped, or upgraded as required to ensure optimal user experience and performance. Salesteq continuously evaluates available technologies to ensure the platform uses the most effective models for each function.

In scenarios where locally deployed models (open-source or private) do not meet enterprise-grade UX requirements, the platform is also fully compatible with **API-based commercial solutions**. This ensures performance, latency, and accuracy can be balanced with security and compliance as needed.

Key principles:

- **Modular AI stack** covering LLM, ASR, TTS, and classification models.
- **Flexible deployment options**: local hosting, private cloud, or hybrid API access.
- **Performance-focused optimization**: caching, model pruning, and adaptive serving infrastructure.
- **Model independence**: AI components can be replaced.

Model Suite In Scope

- **ASR:** Nvidia FasConformer, Conformer
- **Voice Generation:** arTST, acotron2, FastPitch
- **Large Language Models**: Qwen3, Gemma

Data & System Integrations

- Secure, real-time data retrieval from MYNM's systems, including Keyloop, inventory feeds, and CRM platforms.
- Voice infrastructure integrated with third-party messaging systems (WhatsApp, Telegram).

Salesteq

Security & Compliance

- Compliant with ISO 27001, SOC 2, and Saudi data protection regulations. The System meets ISO 27001, SOC 2, and Saudi data protection requirements through: secure data storage and transmission (encryption, SSL/TLS), controlled access via enterprise OAuth, automated backups, and disaster recovery processes. Regular internal audits and monitoring ensure these controls are effective.
- Encrypted storage and SSL/TLS for all data transmission.
- Enterprise OAuth authentication.
- Automated backups.
- Disaster recovery: RTO of 4 hours, and RPO of 15 minutes.

10. ***Out of scope terms and conditions:***

- Phone number confirmation is implemented via a third-party solution.
- Providing metadata (specs, options, media, etc.) for cars is the Service Recipients's responsibility.
- Providing locations, inventory and other conversation relevant material is the Service Recipient's responsibility.
- Ensuring the functionality of third-party services integrated with the system, as required by system requirements, is the Service Recipient's responsibility.
- Providing access, payment, and documentation for all third-party systems is the Service Recipient's responsibility.

Salesteq

Milestones and Delivery

The Development Services shall be delivered on a fixed-price basis as specified below. Each milestone includes the corresponding scope and timeline. The Service Provider may complete any milestone earlier than the agreed deadline, subject to acceptance by the Service Recipient. Early completion shall not affect the fixed price.

Milestone	Scope Summary	Timeline
3.1 Inbound AI Agent	Multi-brand AI chat for inquiries, complaints, OTP auth, and Keyloop integration.	MVP: Month 1 Full: Month 3
3.2 Outbound AI Sales	Proactive AI sales agent for upsell, reminders, and offers.	Month 5
3.3 Sales Enablement	Internal AI assistant for reps, callbacks, and knowledge base.	Month 6
3.4 Call Analytics	Transcriptions, tone analysis, sentiment tracking.	Month 4
3.5 AI Analytics	Monitoring user engagement, interactions and agent efficiency.	Month 5
3.6 Dashboards	Real-time reports segmented by brand/division.	Month 5

The total contract price is $372,842 USD. Payment shall be made as follows:

Payment Schedule:

Milestone	Amount (USD)
Upon Contract Signing	$74,568.40
R1: Advanced Sales Chat & Search	$149,136.80
R2: Sales AI	$74,568.40
Call Analytics & Dashboard Delivery	$74,568.40

Salesteq

Reports and handover

The Service Provider shall submit a written report upon completion of each Stage, describing the work performed and confirming the readiness of the deliverables for acceptance by the Service Recipient.

Such report shall be provided to the Service Recipient within five (5) business days following the completion of the relevant Stage by email.

Exhibit B – Technical Support Services

This Support Agreement covers ongoing technical support for the MYNM AI platform.

1. Scope of Support

- We provide support for the MYNM AI platform, including monitoring, troubleshooting, and maintenance of the software and servers we set up.
- Support includes responding to Tickets (support requests) sent by email support@salesteq.com or through the dedicated support chat.
- We do not cover external issues outside our control (e.g. Service Recipient's hardware, internet, power, third-party services).

2. Service Hours & Response Times

We monitor the platform 24/7. Support requests are categorized and handled as follows:

Priority	Description	Response Time	Resolution Target
P1 – Critical	Full outage or critical issue stopping use of the platform	Start within 20 mins	Fix within 6 hrs
P2 – High	Major issue causing slowdown but platform usable	Start within 45 mins	Fix within 14 hrs
P3 – Normal	Minor issues not blocking operations	Start within 2–4 hrs	Fix within 24 hrs

3. Fees

Fixed monthly fee: **SAR 12,000** (includes up to 20 engineer hours during Mon–Fri, 09:00–19:00).

Extra hours (if needed):

- Engineer: SAR 250/hour
- Architect: SAR 356/hour
- Off-hours work: SAR 337/hour

Unused hours do not roll over.
Fees are paid monthly in advance. Extra hours are billed at the end of the month.

4. Service Reporting

- We provide a monthly report of tickets handled, time spent, and issues resolved.
- If no issues occurred, no report is needed.
- The Service Recipient has 5 business days to raise objections; otherwise, the report is deemed accepted.

Salesteq

6. Term & Termination

- The support term is 1 year, The support term will start on the date the system is fully deployed to production.
- After the first year, the agreement automatically renews annually unless either party terminates with 90 days' written notice.
- Termination after the first year, with 90 days' written notice.
- All payments must be up to date before termination is effective.

7. Additional Benefits

- Free access to all updates and improvements released during the support period.
- Extended coverage: 15 months warranty instead of 12.
- Extra 20 days of engineering support during the first month.

AMENDMENTS

- Extended Support Coverage: 15 months instead of 12.
- 20 days of additional engineering budget instead of 5 in the first Month.
- Free access to all updates and improvements released during the support coverage.
